Camera Studio: Optimized For Chrome OS
Quick Start Guide

🚀 Get Started

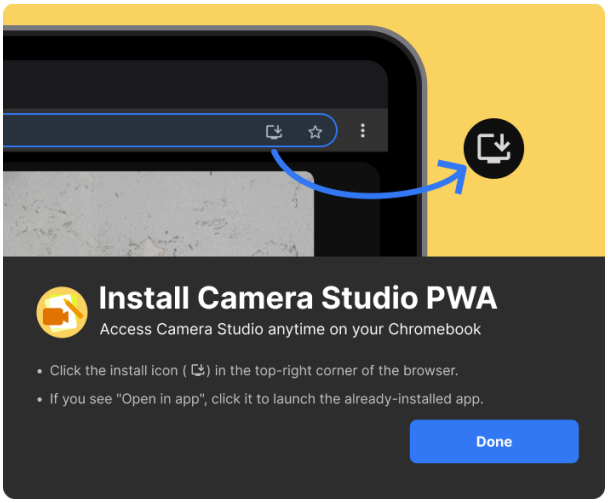

Installing the app makes it easier to access.

Click **“Get App Now”** when you first open Camera Studio.

Already installed? You’ll see how to open or reinstall it anytime.

(a) First-time App install Pop-up

(b) Manual install instructions

✨Feature Tour

Want a quick overview?

You can take the **Feature Tour** when launching the app - or skip and explore freely.

You'll always find the tour again in the **More Options > Support** section.

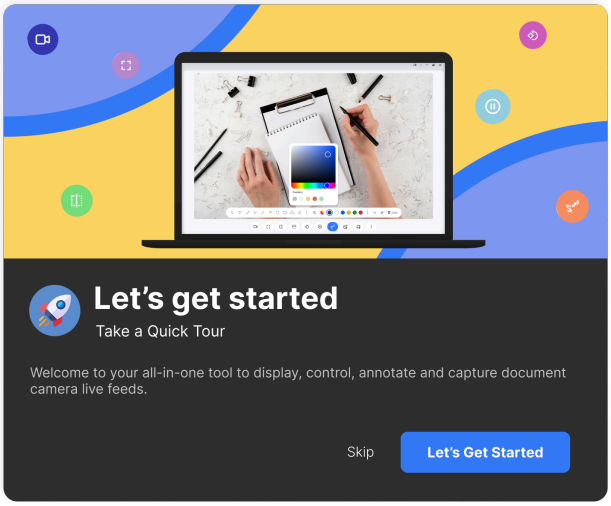

Figure 2 - Feature Tour

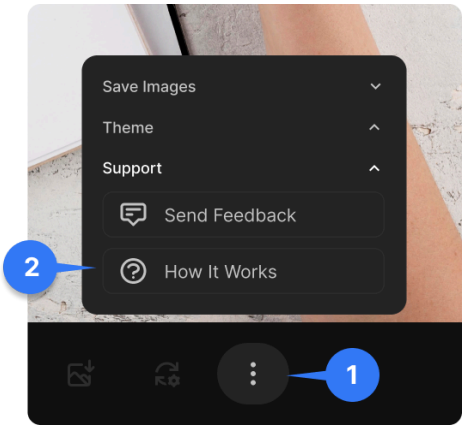

Figure 3 - Accessing Feature tour

🎦 Camera Settings

Camera - Ratio - Resolution

Choose your **camera**, **resolution**, and **aspect ratio** from the Camera Settings menu.

The app will automatically apply the best settings for your camera.

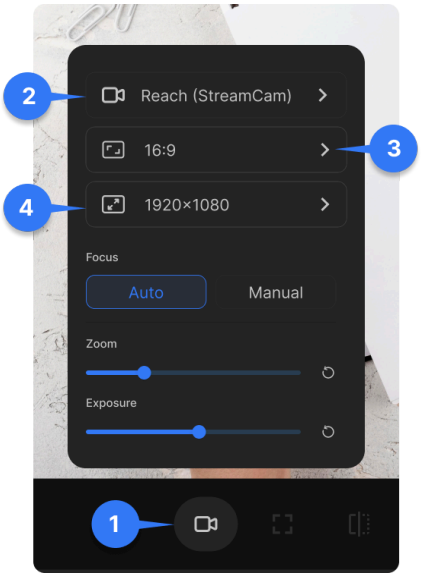

Figure 4 - Camera Settings

Focus

Use Auto Focus by default, or switch to Manual for fine-tuning.

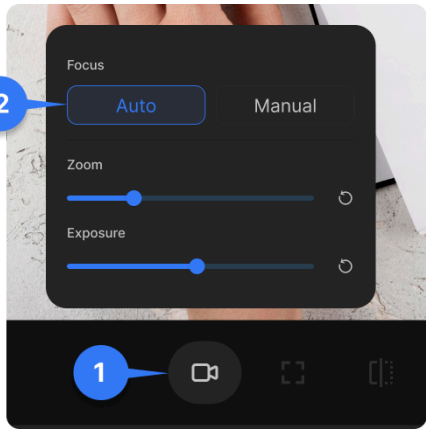

Figure 5 - Auto Focus Mode

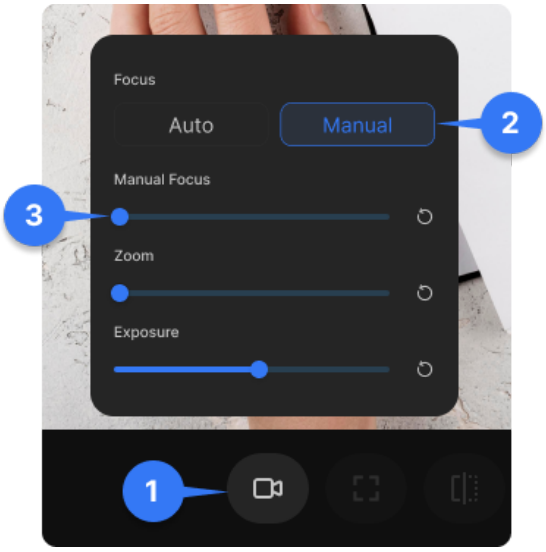

Figure 6 - Manual Focus Mode

Zoom

Zoom in using the slider [1, 2] or trackpad [5], pan around [3] the zoomed view and hide [4] the window if needed.

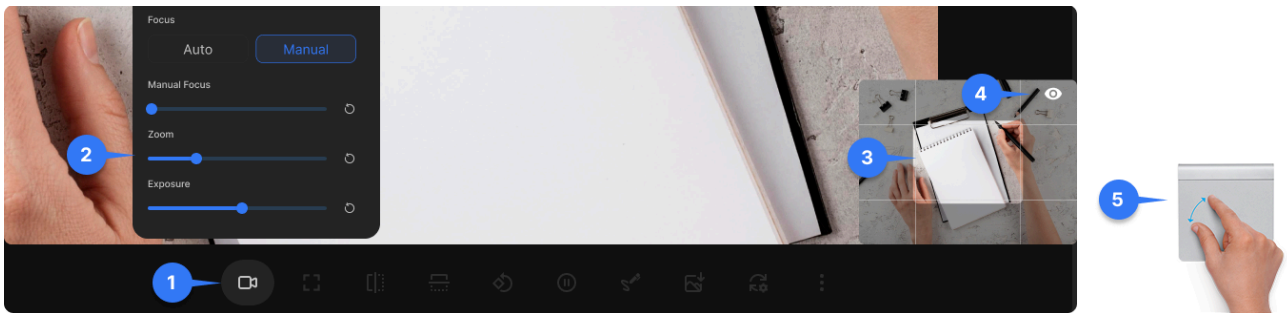

Figure 7 - Zoom & Pan

Exposure

Use the slider to make the live feed brighter or darker (default is 50%) and reset it anytime

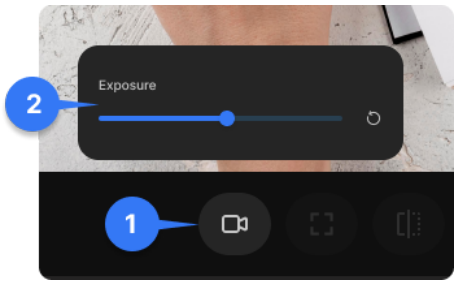

Figure 8 - Exposure

🖼️ Live Feed Adjustments

Full Screen - Flip - Rotate - Freeze

View in Full Screen [1] mode, flip [2] the live view vertically or horizontally or rotate [3] in 90° increments.

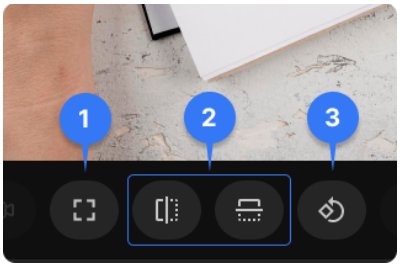

Figure 9 - Flip & Rotate

Use the Freeze button to pause and resume live camera feed anytime.

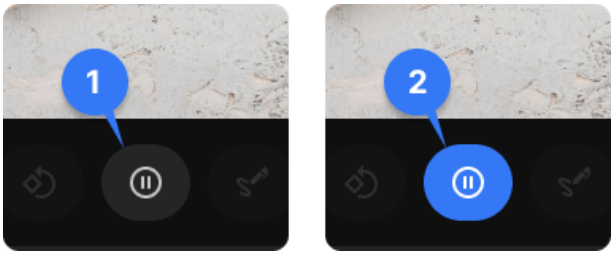

Figure 10 - Pause & Resume Live Feed

✏️ Draw & Annotate

Draw, highlight, add text or shapes right on the live feed and choose stroke thickness.

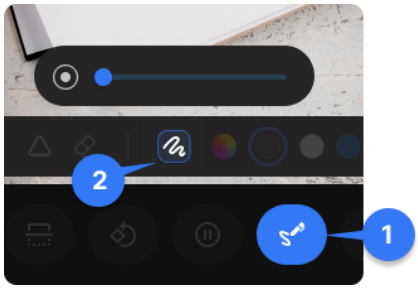

Figure 11 - Adjust Stroke Thickness

Select a font from the list and switch to the mouse pointer to move or edit texts.

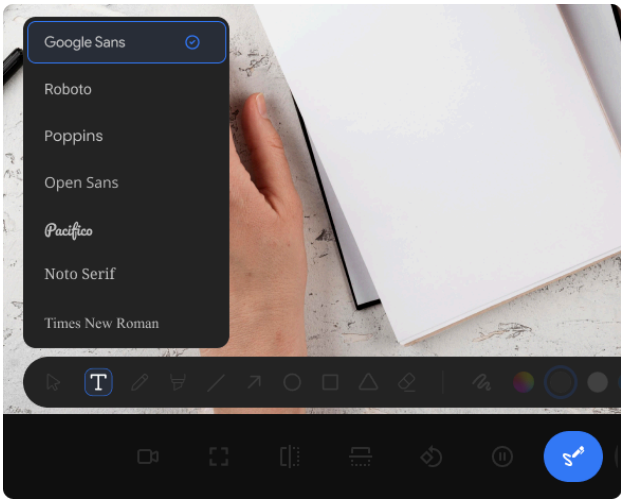

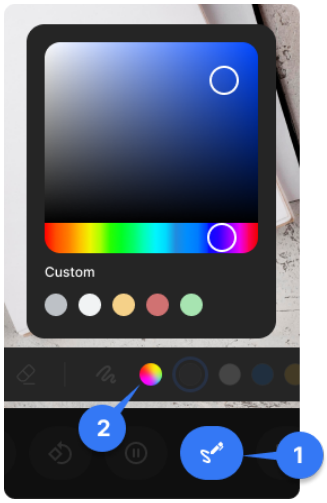

Figure 12 - Font Selection

Pick a color from default options or choose your own using the color selector.

Figure 13 - Custom Color Picker

Use undo/redo to step back or forward, and the eraser or 'Clear All' to remove annotations

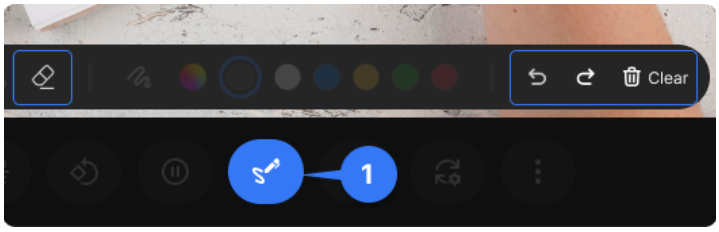

Figure 14 - Undo, Redo, Erase, and Clear all

📸 Capture & Save

Click the camera icon to capture the live feed.

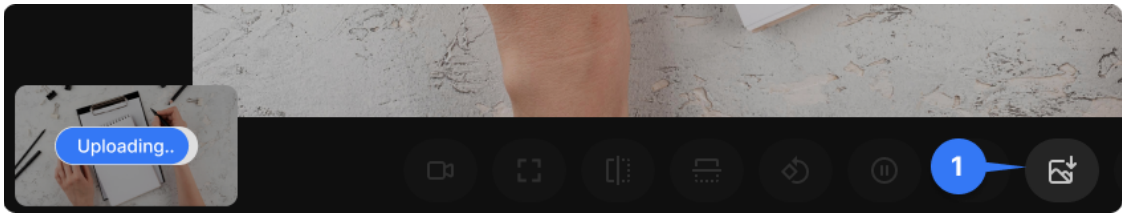

Figure 15 - Capture Live Feed

The first time, you'll be asked to either **save to your device** or **sign in with Google** to save to Drive.

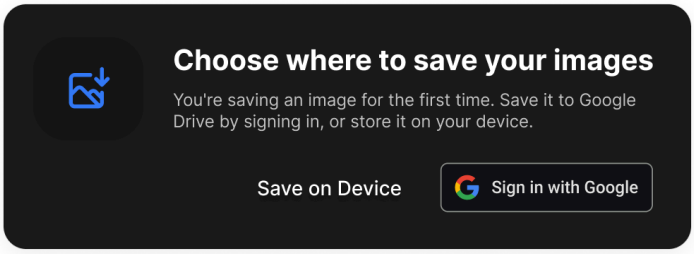

Figure 16 - Choose Image Storage Location

Snapshots saved to Drive go into a folder called "Camera Studio".

You can view the signed-in account and change your storage location anytime.

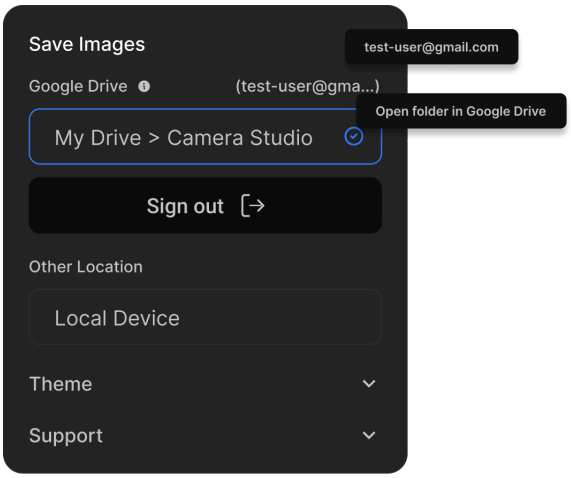

Figure 17 - Drive Storage Path & Account Information

⚙️Reset Settings

Reset all camera settings, live feed adjustments & clear all annotations anytime with just one click.

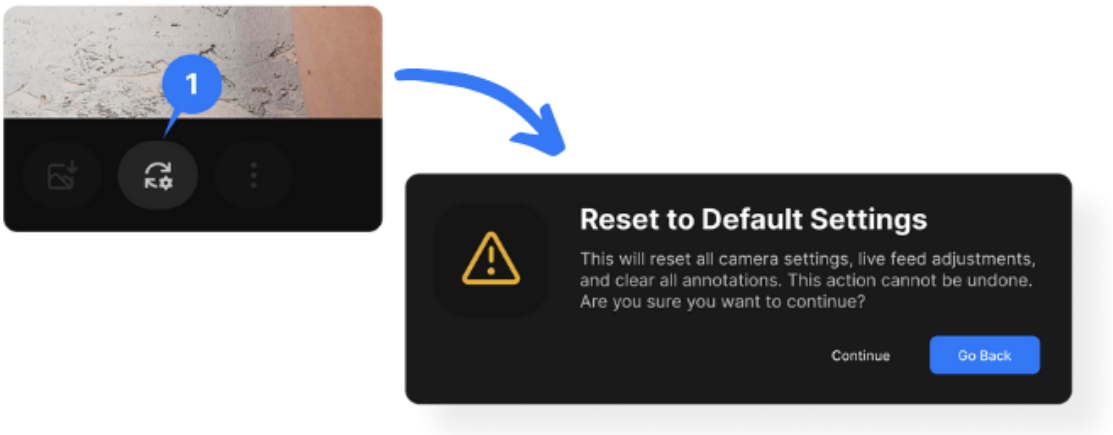

Figure 18 - Reset to Default Settings

🗣️ Language Selection

Your **system language** is automatically set as the default.

Want to change the language?
Use **More Options > Language** to choose your preferred option from the list.

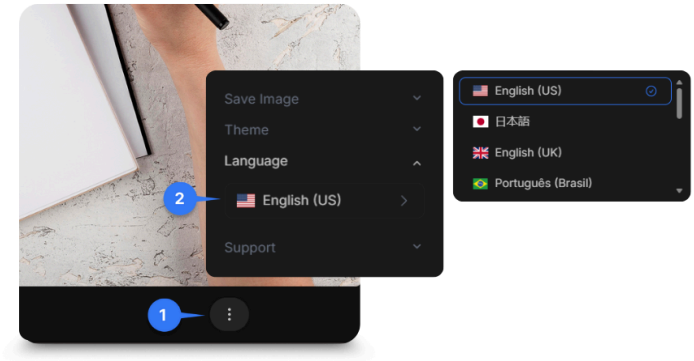

Figure 19 - Language Selection Steps

🎨 Themes & Feedback

Choose between Light, Dark, or System Default themes.

Want to share feedback? Use **More Options > Support > Send Feedback**.

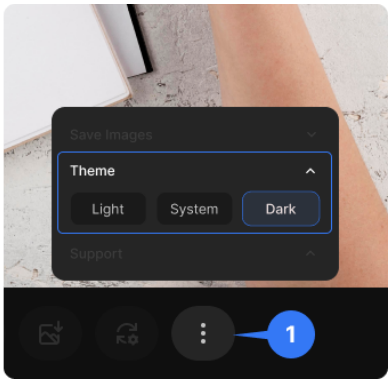

Figure 20 - Theme selection

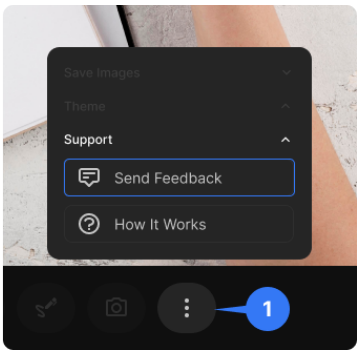

Figure 21 - Send Feedback

Note: System Default works only if your Chrome browser theme is set to follow the device theme.

Accessibility

Camera Studio supports **ChromeVox screen reader** on any Chromebook.

Use `Ctrl + Alt + Z` to turn it on or off.

📌 Pin Camera Studio to Your Shelf

Want faster access? You can **pin Camera Studio** to your Chromebook shelf so it's always one click away.

1. Open the **Launcher** (circle icon in the bottom-left corner).
2. Search for **Camera Studio**.
3. Right-click (two-finger tap) on the app icon.
4. Select **"Pin to shelf."**

✅ Once pinned, the app will appear on your bottom shelf for **quick access anytime**.
